

ROMANPANEL is a unique, stylish and practical solution for inclined and parallelogram shaped windows. Beautiful fabric cascades to create a tailored yet cosy atmosphere for any cabin.

- Control light, temperature, and privacy, this product does not offer blackout
- 100% marinised
- Choice of a wide range of fabrics.
- Powered only, no manual version available currently

Fabrics

- Oceanair: Please refer to our new Fabric Selection for choice of fabrics
- Custom: A separate form (Soft Furnishings Project Custom Fabric Spec Sheet) along with sample of the chosen fabric will be required
- Fabric options: Face fabric (double sided)

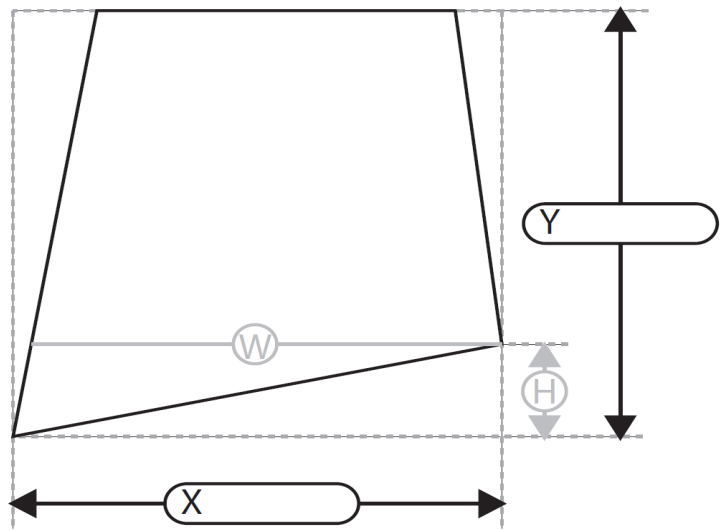

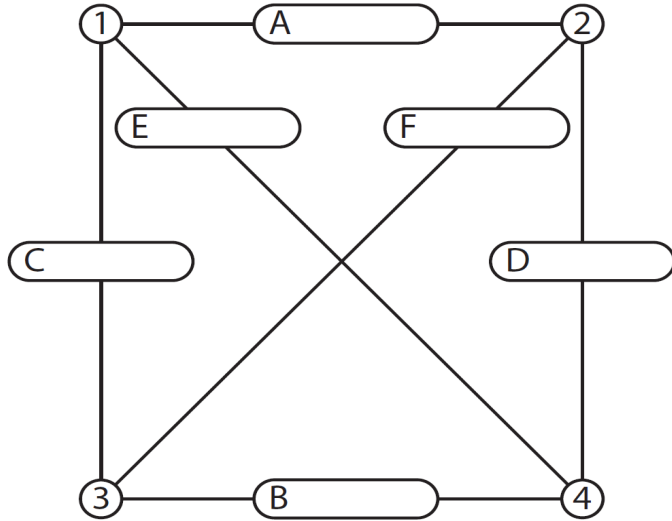

Headrail, Width, Drop & Motor Options

Motor options	Headrail	Width (mm)		Drop (mm)	
		Min	Max	Min	Max
Somfy LS40 110/240v AC	VB50	600	3000	350	3000
Somfy Lw25 -B83 24v DC	RBXL	550	3000	350	1800
Somfy Lw25 -B83 24v DC	RBXL	650	3000	350	3000
somfy sonesse 30 24v DC	VB50XL	565	3000	350	3000
Lutron QED64	VB50XL	565	3000	350	3000

Operation

- Control options: Switched or remote, motor dependant
- Angle suitability: Up to angle of 30° from vertical but shape dependant
- Restraint: Side tracks (recessed only)
- Panel depth Minimum 100mm, Maximum 500mm (shape dependant)
- Product depth 80mm

Measuring notes

Measure the sides a (A, B, C & D), overall width (x) , Drop (Y) along with dimensions (w) & (H). Check corners 1 & 2 are level with each other. Corners 3 and 4 do not need to be level but they must be less 150mm [6"] apart vertically (H). The width at the bottom (W) can be longer but, no more than 40mm [1 than the width at the top (A).

For more complex shapes: If any the following applies, the overall appearance may be affected and a template will be required, contact Oceanair for advice.

- Corners 1 and 2 are not level with each other,
- Side tracks (C and D) are curved or
- Side tracks are not parallel and the whole blind is twisted

Shapes Available

- Any of these shapes can be made, consult with Oceanair for product design.
